

presents

Bully for You is an online interactive anti-bullying program involving students in solving a 'real' cyber-bullying situation!

A PROBLEM IS POSED

Ted, a new student, has gone missing from school. The school, family and friends are concerned and have asked for students' help. As students investigate they find that Ted has been subjected to cyber-bullying but ... students can help him!

This alternative reality game uses simulated media to tell a story. BULLY FOR YOU actively engages and involves students in identifying and addressing issues around cyber-bullying. It is done within a safe, self-contained, interactive website.

Recommended for students aged 10+ years
