THE BAR MODEL

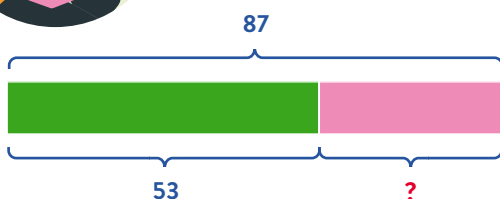

Recently added to the new mathematics curriculum, **The Bar Model** is a practical, visual strategy that helps students solve word problems.

It is fully integrated into **PRIME Mathematics** resources.

Why don't you try some of these 'book' problems with your class?

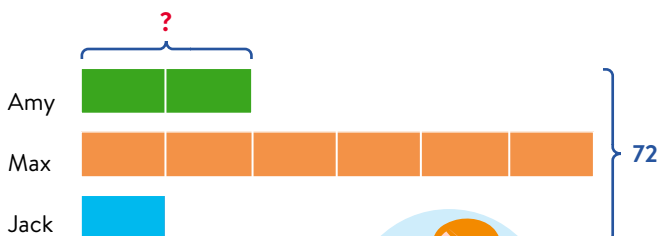

Oliver is reading a book with 87 pages in it. So far, he has read 53 pages. How many more pages does he have to read?

$$87 - 53 = 34$$

Oliver has 34 more pages to read.

Max borrowed 3 times as many books from the library as Amy. Jack borrowed half as many books as Amy. Amongst the three children, they borrowed 72 books. How many books did Amy borrow?

$$9 \text{ units} \rightarrow 72$$

$$1 \text{ unit} \rightarrow 72 \div 9 = 8$$

$$2 \text{ units} \rightarrow 8 \times 2 = 16$$

Amy borrowed 16 books.

PRIME AUSTRALIA

Supporting teachers and engaging students

- **Teacher support:**

PRIME Maths provides professional development for teachers including training on

- **Enhanced student outcomes**

Explicit teaching in PRIME Maths focuses on the development of mathematical concepts, using a variety of methodology.

- **Consistent and effective teaching**

METHOD

Problem solving made easier!

Instead of jumping straight into numbers and operations, students use bar models to **visualise and clarify number relationships**—like part-whole, comparison, or proportional reasoning. Bar models help students see how quantities relate to each other. For example, in a word problem involving addition or subtraction, the bars can show parts and wholes clearly.

SCAN TO WATCH
THE PROMO

LASTIC

Mia surveyed her class for the number of fiction and non-fiction books they read in the last month. She found that her classmates read 273 fiction books and 87 fewer non-fiction books.

How many non-fiction did Grace's class read? How many books did they read altogether?

$$273 - 87 = 186$$

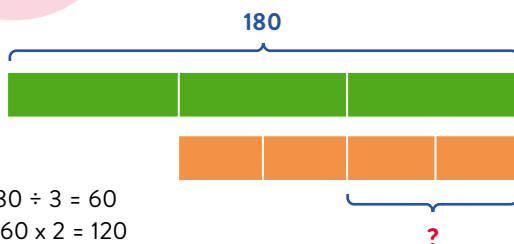

Grace's class read 186
non-fiction books last month.

$$273 + 186 = 459$$

Grace's class read 459
books altogether.

Billi read one third of a 180 page book on Monday and three quarters of the remaining pages on Tuesday. How many pages did she have left to read?

$$1 \text{ unit} \rightarrow 180 \div 3 = 60$$

$$2 \text{ units} \rightarrow 60 \times 2 = 120$$

There were 120 pages to read after Monday.

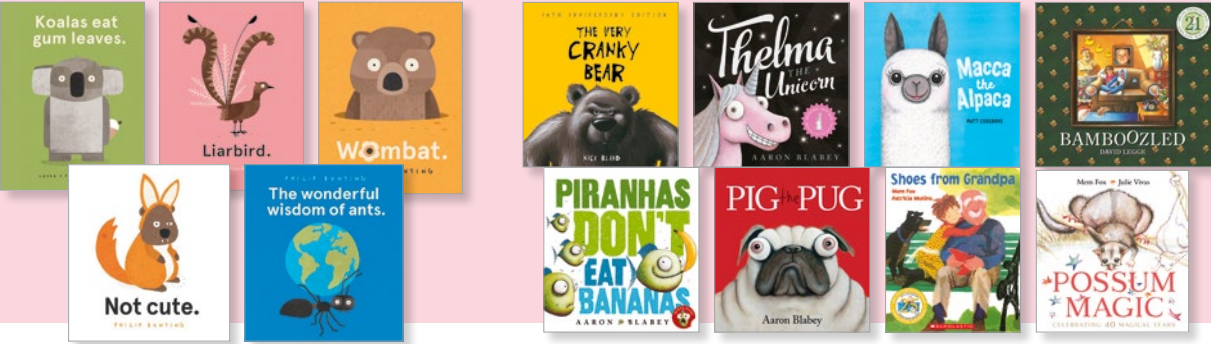

$$1 \text{ unit} \rightarrow 120 \div 4 = 30$$

There were 30 pages left to read.
